Abstract

The main idea of this project was to connect with schools from all over the world and to do good things for people and for nature around us. Our goal was to do things that made the world a better and a nicer place to live in. With students we explored various activities to learn how we can help each other and how we can develop meaningful relationship with people around us and with nature. Students discovered their talents, increased their self-esteem and desire to perform in public. Throughout the whole year our students connected with children from other participating countries, they learned some of their language, their culture and they reported on activities carried out during the project at school. The project was extremely successful. We connected with 22 countries from the whole of Europe. We shared our experiences through the eTwinning platform and also over online meetings. We also made an international anthem for the project. Students were very proud of themselves for being a part of this project.

Keywords: Good things, connecting with other countries, positive thinking, friendship
